

THE GELATO
CART

IMMERSIVE
BUSINESS SOLUTIONS

Modern technology, Italian flair

Designed for long-lasting performance and engineered to perfection, the Pozzetti Gelato Cart is outfitted with all the necessary equipment for a ready-to-use gelato parlour on wheels, including a Pozzetti gelato counter with a six tub drop-in system.

The cart can be operated with ease virtually everywhere, from outdoor locations such as vibrant neighbourhoods and lively parks to indoor spaces such as private venues and commercial establishments.

It can be used as a mobile gelato shop or set up as a stationary gelato stand in a permanent location. By pairing it with an electric bicycle, such as our Electric Chopper, the cart becomes a Gelato Bike, ready to take on the most popular spots in town.

Stylish, hard-wearing and practical, the Pozzetti Gelato Cart is the perfect solution for gelato parlours seeking to expand their serving facilities, as well as for cafés, restaurants and hotels that want to add a gelato counter on their premises.

Its perfect size, storage capacity and ease of use also make it ideal for catering to private functions, large-scale events and everything in between.

ONE GELATO CART

TWO TRACTION MODES

The Pozzetti Gelato Cart can be connected to and towed by any ebike thanks to our patent-pending universal saddle hitch system.

GELATO BIKE MODE

4

PUSH CART MODE

For increased maneuverability in outdoor and indoor locations, the Pozzetti Gelato Cart is equipped with an ergonomic handlebar.

5

The first Gelato Cart in the world designed to be towed by an e-bike

Paired with our specially designed electric chopper, the Pozzetti Gelato Cart becomes a sleek Gelato Bike ready to take on the best spots in town.

Gelato Cart Features

With a steel body and an aluminum roof frame, the Pozzetti Gelato Cart features a food-grade stainless steel countertop, two interior storage compartments and two custom electric chopper bike wheels.

The cart's casing components are designed to be easily removable, allowing a fast and effortless access to its equipment, motor and electrical parts.

The standard model comes equipped with a Pozzetti gelato drop-in system with 6 double stainless steel carapina pans and ventilated refrigeration (forced-air cooling) which ensures a constant temperature of -18° C. This equipment requires access to a 220V energy source.

Optionally, the cart can be outfitted with a glycol cooling system and/or an energy independent power kit (150W - 300W solar panel and electrical system).

The cart is available in two colour schemes, black or white, and can be branded with custom graphics either by us or by the end user.

STANDARD FEATURES

Standard & Custom

Our Food Carts portfolio includes a broad range of projects, both standard and custom. But, beyond their shared features, each one of our carts is unique, just like the businesses we help our customers build and grow.
